## User Database For Acces To Shopping Website

The screenshot displays the MySQL Workbench interface. The 'Schemas' pane on the left shows the 'myproject' database selected. The 'Table: user' is highlighted, and its columns are listed: id (int AI PK), name (varchar(50)), address (text), email (varchar(50)), username (varchar(50)), and password (varchar(50)). The 'Result Grid' shows the data for the 'user' table, including columns like id, name, address, email, username, and password. A MySQL 8.0 Command Line Client window is open, showing the command 'show databases;' and the output listing various databases: database, deneme, information\_schema, modeldb, myproject, mysql, performance\_schema, sakila, sys, userdb, and world.

id	name	address	email	username	password
